

Rangehood measurement sheet

Measure the kitchen; confirm the installation requirements.

Write dimensions in millimetres (mm). Leave unknowns blank.

Rangehood brand + full model code	Cooktop model + fuel / type
-----------------------------------	-----------------------------

01 Measure the space in your kitchen

Record the actual opening. Compare it with the exact installation drawing.

Illustrative only; no clearance is specified by this diagram.

Duct route / layout sketch

Mark outlet, bends, power and obstructions. Note route length.

Width **Height** **Depth**
_____ mm _____ mm _____ mm

Cooktop width (mm): _____ Cooktop depth (mm): _____

02 Copy requirements from the exact Australian manuals

Hood overall W x H x D (mm)	Required cutout W x H x D (mm)
Measured cooktop-to-hood gap (mm)	Required gap + measuring points (mm)
Specified duct size + material	Manual / page / date checked

Installer to confirm measuring points, clearances and all local requirements.

03 Confirm the air route and access

Outside outlet OR recirculation return-air position / replacement air:

Mounting support / power / filter and motor access / approvals:

Installer / unresolved checks / who will confirm:

04 Check ownership and total cost

Odour filter part / care / interval	Filter price / full installation quote
-------------------------------------	--

Confirm coverage, noise and lighting before ordering.

Planning record only. Not installation approval.
