

Australian Spring Home Maintenance Checklist

A practical pre-summer check for Australian homes. Tick only the jobs that apply to your property.

Outside the home

- ☐ Walk around the exterior and look for obvious damage or staining
- ☐ Check gutters and downpipes for visible debris or damage
- ☐ Check ground-level drains and stormwater grates
- ☐ Check rainwater-tank inlet screens if applicable
- ☐ Trim or address vegetation contacting the house where appropriate
- ☐ Note any roof or high-access issues that need professional attention

Windows, doors and screens

- ☐ Check windows open and close correctly
- ☐ Check external doors latch correctly
- ☐ Inspect flyscreens for holes or damaged frames
- ☐ Check obvious door and window seals
- ☐ Clean accessible sliding-door/window tracks
- ☐ Check security screens and doors operate normally

Prepare for warmer weather

- ☐ Check awnings, blinds and external shade
- ☐ Identify rooms that overheated last summer
- ☐ Check obvious gaps that allow hot outside air in
- ☐ Check ceiling fans before regular summer use
- ☐ Check portable fans and visible cords/plugs
- ☐ Review insulation or shading if rooms remain difficult to cool

Australian Spring Home Maintenance Checklist

A practical pre-summer check for Australian homes. Tick only the jobs that apply to your property.

Air conditioning

- ☐ Test the air conditioner before the first hot day
- ☐ Clean accessible filters according to the manufacturer's instructions
- ☐ Check indoor airflow
- ☐ Clear obvious debris around the outdoor unit
- ☐ Check for unusual noise, smell, leaking or weak cooling
- ☐ Arrange professional attention if something is not operating normally

Moisture and ventilation

- ☐ Check bathrooms and laundries for recurring damp or mould
- ☐ Look around windows for condensation-related damage
- ☐ Check under sinks for signs of moisture or leaks
- ☐ Check bathroom and kitchen exhaust ventilation
- ☐ Investigate persistent moisture instead of simply covering it

Safety

- ☐ Test smoke alarms according to manufacturer and local requirements
- ☐ Check outdoor steps and handrails for obvious problems
- ☐ Check decks or balconies for visible deterioration
- ☐ Check outdoor power-point covers for visible damage
- ☐ Arrange licensed/specialist help where required

Quick indoor check

- ☐ Check for dripping taps or obvious plumbing leaks
- ☐ Check visible appliance hoses for deterioration where appropriate
- ☐ Tighten simple loose cabinet or door hardware where safe
- ☐ Replace failed light bulbs
- ☐ Make a short repair list for anything needing professional attention

Not every task applies to every home. Work safely, follow manufacturer instructions and use appropriately qualified trades or specialists where required.
