

Dishwasher measurement sheet

Measure the actual cavity, not the old appliance.

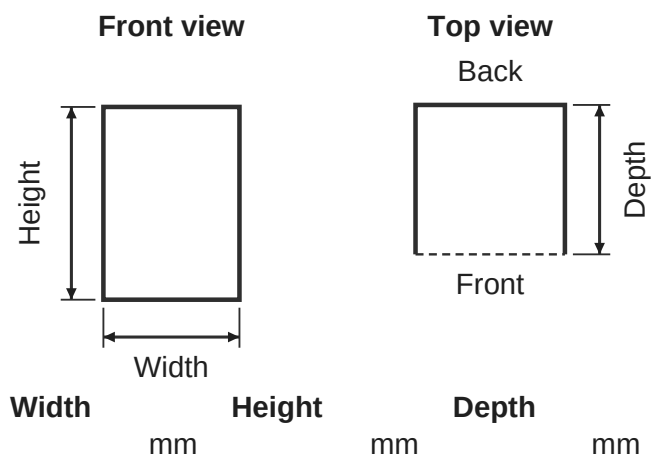

Write every measurement in millimetres (mm).

Brand and full model code

01 Measure the space in your home

Check width and height at the front, middle and rear.

Write the smallest usable measurements on the diagram.

Sketch your layout

Mark taps, pipes, power points, trim and other obstructions.

Allow for skirting and obstructions. Leave inaccessible areas unconfirmed.

02 Check the new model's required space

Copy these figures from the exact model's installation guide.

Product width (mm)	Product height (mm)	Product depth (mm)
Required cavity W x H x D (mm)		Required gaps: sides / rear / top (mm)

Check the drawing for the fitted door, panel and kickboard. Parts may sit outside the cavity.

03 Check doors, connections and installation

Open door and extended rack reach / remaining walkway (mm):

Taps, drain and power / hose route and reach:

Foot adjustment / level floor / fixing, panel and kickboard:

04 Check the delivery route

Packaged size W x H x D (mm)	Narrowest doorway / hall W x H (mm)
------------------------------	-------------------------------------

Check tight turns, stairs and lifts with the delivery team.

Before ordering, confirm any unknowns with the retailer or installer.
